TRENDS

To B, or not to B: that is the question
Richard B. Gallagher and Dennis G. Osmond 1

Lymphocytes play the music but the macrophage calls the tune
Werner Solbach, Heidrun Moll and Martin Röllinghoff 4

Today's Immunology Today
Richard B. Gallagher and Christine Doberska 6

VIEWPOINT

T-cell development in the fetus and the invariant series hypothesis
Richard Aspinall, Jaap Kampinga and Johan van den Bogaerde 7

A mouse model for Borrelia burgdorferi *infection: approach to a vaccine against Lyme disease*
M.M. Simon, U.E. Schaible, R. Wallich and M.D. Kramer 11

REVIEW

Fibrogenic cytokines: the role of immune mediators in the development of scar tissue
Elizabeth J. Kovacs 17

Barrier cells in the spleen
Leon Weiss 24

Prominence of γδ T cells in the ruminant immune system
Wayne R. Hein and Charles R. Mackay 30

Phosphatidylinositol membrane anchors and T-cell activation
Peter J. Robinson 35

KALEIDOSCOPE

Immunology Yesterday: The discovery of the immunological function of the thymus
J.F.A.P. Miller 42

Letters 45

Book reviews 48

February

TRENDS

Bispecific antibodies and targeted cellular cytotoxicity
Michael W. Fanger, David M. Segal and Jean-Loup Romet-Lemonne 51

New cytokines and receptors make their debut in San Antonio
Scott K. Durum, Daniel G. Quinn and Kathrin Muegge 54

VIEWPOINT

Genetic variation in the stress response: susceptibility to experimental allergic encephalomyelitis and implications for human inflammatory disease
Don Mason 57

Autoimmunity to lysosomal enzymes: new clues to vasculitis and glomerulonephritis?
C.G.M. Kallenberg, J.W. Cohen Tervaert, F.J. van der Woude, R. Goldschmeding, A.E.G. Kr. von dem Borne and J.J. Weening 61

REVIEW

Special Feature: T-cell development

Phenotypic and functional stages in the intrathymic development of αβ T cells
Janko Nikolić-Žugić 65

Towards an integrated view of thymopoiesis
Richard L. Boyd and Patrice Hugo 71

T-cell development and transmembrane signaling: changing biological responses through an unchanging receptor
Terri Helman Finkel, Ralph T. Kubo and John C. Cambier 79

Towards a molecular understanding of T-cell differentiation
Hans C. Clevers and Michael J. Owen 86

Immunoparasitology Today

INTRODUCTION

Co-evolution of parasites and adaptive immune responses
Graham F. Mitchell A2

NONSPECIFIC DEFENCE

The acute phase protein response during parasitic infection
Andrew W. Stadnyk and Jack Gauldie A7

The involvement of TNF, IL-1 and IL-6 in the immune response to protozoan parasites
Richard G. Titus, Barbara Sherry and Anthony Cerami A13

Nonspecific defence mechanism: the role of nitric oxide
F.Y. Liew and F.E.G. Cox A17

Strategies of obligate intracellular parasites for evading host defences
B. Fenton Hall and Keith A. Joiner A22

KEY MOLECULES

Molecular genetics of antigenic variation
Piet Borst A29

Antigenic polymorphism in malaria: is it an important mechanism for immune evasion?
Kamini N. Mendis, Peter H. David and Richard Carter A34

Heat shock proteins in host–parasite interactions
Barbara S. Polla A38

Genetic control of innate resistance to mycobacterial infections
Erwin Schurr, Danielle Malo, Danuta Radzioch, Ellen Buschman, Kenneth Morgan, Philippe Gros and Emil Skamene A42

Life cycles A46

T-CELL SUBSETS

The role of IL-10 in crossregulation of T_H1 and T_H2 responses
Tim R. Mosmann and Kevin W. Moore A49

Regulation of the immune response in lymphatic filariasis and onchocerciasis
Christopher L. King and Thomas B. Nutman A54

Helper T-cell subsets in mouse leishmaniasis: induction, expansion and effector function
Richard M. Locksley and Phillip Scott A58

Regulation and biological function of helminth-induced cytokine responses
Fred D. Finkelman, Edward J. Pearce, Joseph F. Urban Jr and Alan Sher A62

IMMUNOEPIDEMIOLOGY

Naturally acquired immunity to Plasmodium falciparum
Karen P. Day and Kevin Marsh A68

Immunoepidemiology of lymphatic filariasis: the relationship between infection and disease
Donald A.P. Bundy, Bryan T. Grenfell and P.K. Rajagopalan A71

Helminths, immunology and equations
Nicky Schweitzer and Roy Anderson A76

April

TRENDS

The molecular biology of MHC genes
Roberto S. Accolla, Charles Auffray, Dinah S. Singer and John Guardiola 97

Lymphocyte antigen receptors: a common design?
Frits Koning 100

VIEWPOINT

Cell dysfunction and depletion in AIDS: the programmed cell death hypothesis
Jean Claude Ameisen and André Capron 102

Autoimmunity, microbial immunity and the immunological homunculus
Irun R. Cohen and Douglas B. Young 105

REVIEW

The distinctive specificity of antigen-specific suppressor T cells
Eli Sercarz and Urszula Krzych 111

Immunomodulation by ultraviolet light: clinical studies and biological effects
D.H. Pamphilon, A.A. Alnaqdy and T.B. Wallington 119

Antigen presentation: structural themes and functional variations
Thomas J. Braciale and Vivian L. Braciale 124

KALEIDOSCOPE

From laboratory to clinic: the development of an immunological reagent
Susan Bright, John Adair and David Secher 130

Letters 134

Book reviews 136

May

TRENDS

Rapamycin: FK506's fraternal twin or distant cousin?
Randall Ellis Morris 137

More insights into the complex physiology of TNF
Salem Chouaib, Didier Branellec and Wim A. Buurman 141

VIEWPOINT

Phospholipase A_2 – a mediator between proximal and distal effectors of inflammation
W. Pruzanski and P. Vadas 143

Staphylococcal-enterotoxin-dependent cell-mediated cytotoxicity
Mikael Dohlsten, Gunnar Hedlund and Terje Kalland 147

Thyroid-associated ophthalmopathy – a model for the association of organ-specific autoimmune disorders
Jack R. Wall, Mario Salvi, Nicole F. Bernard, Andrée Boucher and David Haegert 150

REVIEW

Natural autoantibodies: from 'horror autotoxicus' to 'gnothi seauton'
S. Avrameas 154

Second generation immune networks
Francisco J. Varela and Antonio Coutinho 159

KALEIDOSCOPE

Immunology Yesterday: The discovery of thyroid autoimmunity
Noel R. Rose 167

Letters 169

Book reviews 172

June

TRENDS

Tolerance and immune regulation
Ellen Robey and Jacques Urbain 175

Immunotherapy of rheumatic diseases – practice and prospects
Gabrielle Kingsley, Gabriel Panayi and Jerry Lanchbury 177

VIEWPOINT

Primitive cytokines: harbingers of vertebrate defense
Gregory Beck and Gail S. Habicht 180

The synergy between naive and memory T cells during activation
Arne N. Akbar, Michael Salmon and George Janossy 184

T-cell memory: the connection between function, phenotype and migration pathways
Charles R. Mackay 189

The dominant self and the cryptic self: shaping the autoreactive T-cell repertoire
Guy Gammon, Eli E. Sercarz and Gilles Benichou 193

REVIEW

The B-cell antigen receptor complex
Michael Reth, Joachim Hombach, Jürgen Wienands, Kerry S. Campbell, Nadine Chien, Louis B. Justement and John C. Cambier 196

Signalling in B cells
José E. Alés-Martínez, Eduardo Cuende, Carlos Martínez-A., R.M.E. Parkhouse, Luis Pezzi and David W. Scott 201

KALEIDOSCOPE

Letters 206

Book reviews 208

July

TRENDS

Epitope mapping
Angela C. Horsfall, Frank C. Hay, Andy J. Soltys and Meinir G. Jones 211

Hard graft? Future challenges in transplantation
Robert Lechler, Richard B. Gallagher and Hugh Auchincloss 214

Peripheral lymph node homing receptor (LECAM-1)
Donald C. Anderson, Eugene C. Butcher, Michael Gallatin *et al.* 216

VIEWPOINT

Is amyloidogenesis during Alzheimer's disease due to an IL-1-/IL-6-mediated 'acute phase response' in the brain?
Peter Vandenabeele and Walter Fiers 217

A new superfamily of cell surface proteins related to the nerve growth factor receptor
Susan Mallett and A. Neil Barclay 220

T_H2 cells in systemic autoimmunity: insights from allogeneic diseases and chemically-induced autoimmunity
Michel Goldman, Philippe Druet and Ernst Gleichmann 223

REVIEW

Delayed-type hypersensitivity and cell-mediated immunity in the pathogenesis of tuberculosis
Arthur M. Dannenberg, Jr 228

Molecular targets in pernicious anaemia
Paul A. Gleeson and Ban-Hock Toh 233

Cytokines in T-cell development
Simon R. Carding, Adrian C.Hayday and Kim Bottomly 239

KALEIDOSCOPE

Letters 246

Book reviews 250

August

TRENDS

Autoimmune myocarditis: concepts and questions
Noel R. Rose, David A. Neumann and Ahvie Herskowitz 253

Immune parameters in HIV infection – a practical guide
George Janossy 255

Human T_H1 and T_H2 subsets: doubt no more
Sergio Romagnani 256

VIEWPOINT

Mitogenic properties of major extracellular proteins
Jean-Pierre Lévesque, Antoinette Hatzfeld and Jacques Hatzfeld 258

Recognition of self within self: specific lymphocyte positioning and the extracellular matrix
Maria de Sousa, Nicholas L. Tilney and Jerzy W. Kupiec-Weglinski 262

What is the basis for HLA-DQ associations with autoimmune disease?
Daniel M. Altmann, David Sansom and Steven G.E. Marsh 267

REVIEW

The Mycoplasma arthritidis *T-cell mitogen, MAM: a model superantigen*
Barry C. Cole and Curtis L. Atkin 271

T-cell recognition of myelin basic protein
Kai W. Wucherpfennig, Howard L. Weiner and David A. Hafler 277

KALEIDOSCOPE

Immunology Yesterday: Experiments of nature in the development of modern immunology
Robert A. Good 283

Letters 287

Book reviews 288

September

The biology of complement

OVERVIEW

Biology of complement: the overture
Taroh Kinoshita 291

Evolution of the complement system
Timothy C. Farries and John P. Atkinson 295

Complement deficiency and disease
B. Paul Morgan and Mark J. Walport 301

MECHANISMS

C1: molecular interactions with activating systems
R.B. Sim and K.B.M.Reid 307

The control of homologous lysis
Peter J. Lachmann 312

Debate: the mechanism of complement lysis

Big MAC attack: complement proteins cause leaky patches
Alfred F. Esser 316

Complement lysis: a hole is a hole
Sucharit Bhakdi and Jørgen Tranum-Jensen 318

INTERACTIONS

The role of complement in inflammation and phagocytosis
Michael M. Frank and Louis F. Fries 322

Complement evasion strategies of microorganisms
Neil R. Cooper 327

The role of C3 in the immune response
Anna Erdei, George Füst and János Gergely 332

The response of human platelets to activated components of the complement system
Peter J. Sims and Therese Wiedmer 338

October

TRENDS

Multiple interactions at the natural killer workshop
Klas Kärre, Mona Hansson and Rolf Kiessling 343

The role of T-cell subsets and cytokines in the regulation of infection
Phillip Scott and Stefan H.E. Kaufmann 346

VIEWPOINT

A new view of prostaglandin E regulation of the immune response
Richard P. Phipps, Sidney H. Stein and Rachel L. Roper 349

Does antibody-dependent epitope masking permit progressive tumour growth in the face of cell-mediated cytotoxicity?
Lionel A. Manson 352

REVIEW

Mls – a retrovirus exploits the immune system
Hans Acha-Orbea and Ed Palmer 356

Signalling through CSF receptors
Gino Vairo and John A. Hamilton 362

Modulation of T-cell function by gliomas
Thomas Roszman, Lucinda Elliott and William Brooks 370

KALEIDOSCOPE
Science training for European journalists
Byron H. Waksman 375
Letters 377
Book reviews 378

November

TRENDS
ISCOMS – a novel strategy for mucosal immunization?
Allan McI. Mowat and Anne M. Donachie 383
How do peptides associate with MHC class I molecules?
Tim Elliott 386
A new nomenclature for B cells
Aaron B. Kantor *et al.* 388
The development and repertoire of B-1 cells (CD5 B cells)
Aaron B. Kantor 389

VIEWPOINT
Functional subsets of allergen-reactive human CD4+ T cells
Martien L. Kapsenberg, Eddy A. Wierenga, Jan D. Bos and Henk M. Jansen 392
Debate: the mechanism of lymphocyte-mediated killing
Lymphocyte-triggered internal target disintegration
Gideon Berke 396
Perforin-induced pore formation
Olivier Krähenbühl and Jürg Tschopp 399

REVIEW
Blocking IL-1: interleukin 1 receptor antagonist in vivo *and* in vitro
Charles A. Dinarello and Robert C. Thompson 404
Shared epitopes among HLA class II alleles: gene conversion, common ancestry and balancing selection
Henry A. Erlich and Ulf B. Gyllensten 411
Expression of perforin and granzymes in vivo*: potential diagnostic markers for activated cytotoxic cells*
Gillian M. Griffiths and Christoph Mueller 415

KALEIDOSCOPE
Letters 420
Book reviews 424

December

TRENDS
Modulation of MHC antigen expression by viruses and oncogenes
D. John Maudsley and John D. Pound 429

VIEWPOINT
On the nature and function of human uterine granular lymphocytes
Ashley King and Yung Wai Loke 432
Extrathymic differentiation of intraepithelial lymphocytes: generation of a separate and unequal T-cell repertoire?
Leo Lefrançois 436

Maintenance of immunological memory: a role for CD5⁺ B cells?
Fons UytdeHaag, Roger van der Heijden and Albert Osterhaus 439
Map of the human major histocompatibility complex
John Trowsdale, Jiannis Ragoussis and R. Duncan Campbell 443

REVIEW
Naturally-occurring peptide antigens derived from MHC class-I-restricted processing pathway
Olaf Rötzschke and Kirsten Falk 447
X-linked immunodeficiencies: clues to genes involved in T- and B-cell differentiation
Geneviève de Saint Basile and Alain Fischer 456

KALEIDOSCOPE
Budapest beckons
Richard B. Gallagher and Janos Gergely 462
